

Standard Warranty

All FELCOtronic tools are guaranteed within one year from the date of purchase against manufacturer's defect. Certain components have extended warranty such as the forged aluminum body (lifetime), the motor, the electronic board and batteries (three years).

Extended Warranty

Services should be performed after 400,000 cuts or at least each year. If services are properly performed by us all components of the tool under one year warranty terms get an extended one year warranty after each of the two first services. The blade and the anvil-blade are not covered by this extended warranty.

Services

We offer several levels of services to fulfill your needs. Even if you are not willing to take advantage of our extended warranty, a service is highly recommended to increase the longevity of the tool life but also to save your money on repairs in the long run.

Basic Service	Regular Service	Premium Service
