We're Expanding into Lynden, WA!

Although we haven't officially opened a new OVS facility yet, our agronomic services recently expanded in Washington to not only include OVS Pasco, but now **OVS Lynden!**

In February Satpaul Neger joined the OVS ag supplies/agronomy team as Territory Manager serving customers in Lynden and surrounding areas.

**OVS McMinnville
Spring/Summer Hours**

7am - 5pm (Mon-Fri)
8am - Noon (Sat)

March 2016

AGRIAN Label Lookup - A Best Friend!

Have you ever searched the small novel called an agricultural chemical label for the rate information? Sure you have. If you gave up and called us, chances are we led you to agrian.com, our favorite searchable database for ag chemical information. Click on **LABEL LOOKUP** on the main page and you're in!

This website is user-friendly and intuitive. Let's say we're looking for Microthiol Disperss, a popular brand of sulfur. Type this chemical name into the Quick Label Search box and click on your choice from the list of product formulations available. Spelling is important, as it is filter-based. For every chemical, the product name will appear on the left, then choose your specific crop, and you will be provided both the label, MSDS Sheet, and any available supplemental label information.

So when those inspectors roll up and ask for your records, agrian.com is a great tool to help you out.

Need to confirm an application rate, here is a great shortcut. Click on Label to open it. Enter Ctrl + F to open the Find function in the program. Enter the word "rate" into the Find box you will find the appropriate application rate section for your crop and sprayer type. As noted on Agrian, "Users must read and follow the actual product label affixed to the container before using the product." Labels are revised for many reasons. Remember that the label on your product is the law!

The Safety tab briefly summarizes the product's required personal protective equipment (PPE).

Hyperlinked logos for both CDMS and Agrian can be found on the OVS website, ovs.com, by clicking on Grower Supplies, then going to the **Fertilizer** or **Ag Chemicals** tabs and scrolling down to see the logos stacked together on the left sidebar. Give Agrian a try and you'll be quickly hooked on this time-saving tool!
