# Have you had your 50 Hour Service?

*Protect your investment by following Kubota's recommended schedule of maintenance on new Kubota equipment after **50 hours** of use.*

***Hauling services available to  
and from your farm to our  
shops!***

## Check List Includes:

- **Engine oil & filter**
- **Transmission oil & filter**
- **Hydrostatic filter (if equipped)**
- **Front axle oil (4WD only)**
- **Change or clean air filter (as needed)**
- **And 15 other critical preventative maintenance checks and adjustments**

*Based on factory recommended Check Points  
Maintenance Table for Kubota products for your  
particular model.*

During the first 50 hours of operation your machine is "breaking in" the moving components within the engine and transmission. This process can often result in a build up of debris, but by changing the oils and filters You can prevent this debris from causing internal damage and ensure your new Kubota is off to a healthy start!
