Application Rates

Young Berries—Soil apply Foundation 10-15 gal/acre (3/4 oz – 1 1/3 oz per plant) to encourage root growth and plant establishment. Band apply (in at least 10-20 gal of water) or inject through drip irrigation (after irrigation filter). Repeat as needed with at least 3 weeks between applications.

Mature Berries—Soil apply Foundation at 10-15 gal/acre (3/4 oz/ – 1 1/3 oz per plant) during periods of root flush, at bud break, and post-harvest. Band apply (in at least 10-20 gal/acre of water) or inject through drip irrigation (after irrigation filter).

Application Precaution: As with all materials, user should exercise precaution to avoid potential foliar burning. Use caution if applying this product in combination with other materials since mixing could result in a potentially hazardous reaction caused by product incompatibilities. A compatibility test is recommended before tank mixing with other products. The pH of any final spray solution should be checked and the appropriate amount of the solution should be applied to a small area of the intended crop to ensure plant compatibility prior to the application. **THE USER ASSUMES FULL RESPONSIBILITY TO ENSURE PRODUCT, EQUIPMENT AND PLANT COMPATIBILITIES.**

Information regarding the contents and levels of metals in this product is available on the internet at
