

Structure®

7-21-0

FORMULATED FOR SOIL APPLICATION,
DRIP SYSTEMS AND MICRO SPRINKLERS

GUARANTEED ANALYSIS

Total Nitrogen (N).....	7.0%
6.0%.....Ammoniacal Nitrogen	
0.3%.....Nitrate Nitrogen	
0.7%.....Urea Nitrogen	
Available Phosphate (P ₂ O ₅).....	21.0%
Zinc (Zn).....	0.2%

Derived from anhydrous ammonia, urea-ammonium nitrate, phosphoric acid and zinc sulfate.

ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S)
7% ACTAGRO ORGANIC ACIDS® derived from leonardite.

Net Contents 5 gallons (18.9 liters)

10.9 lbs. per gallon (1307 grams/liter) @ 68° F

FOLIAR MIXING INSTRUCTIONS

STRUCTURE® mixes easily with water as follows:

1. Partially fill tank with water and start agitation.
2. Add pesticides or other nutrients. STRUCTURE® is compatible with micronutrients if used at a minimum of 8 parts to 1 part micronutrient.
3. Add STRUCTURE® to circulating tank mix.
4. Fill tank and agitate thoroughly.

DIRECTIONS FOR USE

STRUCTURE® can be applied to most vegetable and cucurbit crops, field crops, row crops, deciduous fruit and nut trees, grapes, berries, olives and citrus. Timing and rate of application for each crop is critical for best results.

Mixing with irrigation water for field storage is generally not recommended. Products blended with irrigation water should be used immediately and not stored for prolonged periods.

SOIL APPLICATION RATES

VEGETABLES, CUCURBITS, ROW CROPS, FIELD CROPS: Inject 15 to 30 gallons per acre prior to planting in the soil 2 to 4 inches directly below the seed line. **Alfalfa Hay:** Dribble 10 gallons per acre. Over newly harvested hay stubble, spray or dribble 8 to 12 gallons per acre. May be applied through center pivot irrigation systems.

DECIDUOUS FRUIT AND NUT TREES, GRAPES, OLIVES AND CITRUS: Inject 10 to 30 gallons per acre 3 to 5 inches deep at the drip line, or surface band and water into the soil.

FERTIGATION: DRIP IRRIGATION - MICRO SPRINKLER (SOLID SET & MOVING SPRINKLERS)

ALL CROPS: Use 5 to 20 gallons per acre per irrigation. Continue irrigation for a minimum of 2 hours after application to flush lines and to maximize nutrient distribution with drip and microsprinkler use.

TRANSPLANT WATER - ALL CROPS: Use 4-8 gallons per acre, not to exceed a 3% solution of Structure to water.

FOLIAR APPLICATION RATES

CAUTION: Foliar application of STRUCTURE® close to harvest may leave a brown residue on the harvestable portion of the crop. Rainfall, sprinkler irrigation or high humidity should alleviate this condition.

Actagro Structure® may be applied to all vegetable crops, row crops, deciduous fruit and nut trees, grapes, olives, citrus, berries and ornamentals. Apply 1/2 to 3 gallons per acre with enough water for adequate coverage (5 gpa minimum). A maximum concentration of 1:10 Structure® to water should be used for foliar applications. May be applied through center pivot irrigation systems.

NOTES: For all crops, the rate of water should be sufficient for thorough coverage. Coverage is dependent on proper droplet size, which is a function of nozzle size and pressure.

APPLICATION THROUGH DRIP IRRIGATION - inject after irrigation filter.

GENERAL INFORMATION

STRUCTURE® contains Actagro Organic Acids® extracted from leonardite in a proprietary formulation. These organic acids are then combined with liquid plant nutrients in a proprietary reaction process.

STRUCTURE® contains nitrogen, phosphate, and chelated zinc. This combination of nitrogen, phosphate and zinc is intended to stimulate early root development, plant growth and fruit set. Using this product in a full Actagro fertilization program may allow for a reduction in total applied nitrogen and phosphate.

STRUCTURE® may be placed safely 1-2 inches below seeds or directly injected into root system as the product is non-phytotoxic at recommended rates.

STRUCTURE® is designed for use in all soil types. It should be concentrated for maximum response. Apply it as a band in the soil or inject it through drip or micro-sprinkler systems. Application rates will vary depending on the crop grown.

STRUCTURE® is an effective foliar nutrient when phosphate levels fall below optimum values. Multiple applications may be beneficial. Applications should be made at night or early in the morning.

WARRANTY: Since weather, crops, soil and other conditions may vary, neither ACTAGRO®, LLC, nor the Seller make a warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risk of use and handling whether or not in accordance with directions or suggestions.

KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN, EYES OR CLOTHING. In case of contact immediately flush skin, eyes or clothing with plenty of water for at least 15 minutes.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

CAUTION: Always check compatibility with other products prior to use. Do not mix with conventional calcium based fertilizers. STRUCTURE® is not compatible with conventional products containing the salts of heavy metals.

"Not all Actagro® products are compatible with one another or when mixed with other fertilizers and/or pesticides on the market. A small scale compatibility test is recommended prior to mixing."
